ABSTRACT

A system and method for a call receiving pager apparatus, system and method utilizing a dedicated switch for providing proprietary access, billing functions and other enhanced features is described. The system utilizes a subscriber apparatus having pager or radiotelephone functions whereby a caller may call the apparatus and gain direct two-way communication with the subscriber. The caller is billed for the communication. ~~The present invention also includes a~~ A call receiving pager apparatus, system and method which enables two-way text messaging as well as the storage, retrieval, and recall of telephone numbers making calls to the pager apparatus where the recalls are made by way of sending a data package to the stored caller number is described. The subscriber is unable to initiate any real time two-way communication with the outgoing connection.
